

NuTone®

Introducing the **LOPROFILE™** ventilation fan

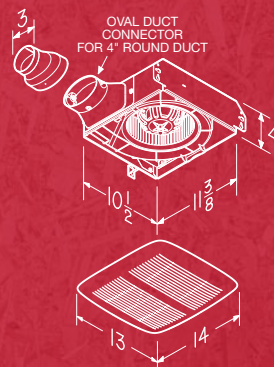

The right fan for a tight fit.

The new NuTone LoProfile™ Fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2x4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications our LoProfile™ fan can still fit without having to move anything. And that means any room with space constraints can have powerful, quiet, efficient ventilation.

Model LPN80 Features

- Fits in 2x4 ceiling or wall construction
- 80 CFM ensures ample air movement
- >50 CFM at 0.25" static pressure meets ASHRAE 62.2 local ventilation requirements
- Only 1.1 sones for extremely quiet operation
- 4" oval or 3" round duct for installation flexibility
- Efficient operation for lower utility bills
- Ideal for multi-family applications

The oval connector accepts standard 4" duct, or 3" duct with the supplied adapter.

Electrical connections can be made through the top or the side of the housing.
